

Core Type Adsorption Air Dryer

Modular Desiccant Air Dryer

Product Description

Demargo (Shanghai) Energy Saving Technology Co.,Ltd-Compressed Air Purification Solutions

Our core type adsorption air dryers are specially designed to deeply remove moisture from compressed air, achieving ultra-low pressure dew point, and providing clean, dry compressed air for various industrial production scenarios that require high air quality.

1. Application Industries

Widely used in electronics & semiconductor, pharmaceutical, food & beverage, automotive painting, precision machinery, petrochemical, aerospace, textile, pneumatic instrumentation, and other industries that have strict requirements on compressed air dryness.

2. Custom Configuration Service

Please provide us with your compressed air flow rate, working pressure, required pressure dew point (such as -20°C, -40°C, -70°C), ambient temperature, and installation space. Our professional technical team will customize the most suitable core

type adsorption air dryer model and overall solution for you.

3. Optional Materials & Components

- Adsorption core: molecular sieve, activated alumina, silica gel (optional according to dew point requirements)
- Tank body: carbon steel (anti-corrosion treated), stainless steel 304 / 316L
- Control system: PLC intelligent control, touch screen operation, automatic switching
- Valves: imported or domestic high-pressure ball valves, solenoid valves
- Accessories: differential pressure gauge, pressure dew point detector, automatic drain valve, silencer
- Regeneration method: heatless regeneration, micro-heat regeneration (optional)
- Voltage: customizable to meet the power supply standards of different countries and regions

4. Main Features

- High drying efficiency, stable pressure dew point, meeting the strict requirements of high-precision industries
- Modular core design, easy to replace, low maintenance cost
- Intelligent automatic control, no manual intervention, stable and reliable operation
- Low energy consumption, energy-saving and environmentally friendly, reducing production costs
- Compact structure, small floor space, easy installation and transportation

For more detailed models, technical parameters, customization options and quotation information, please contact us for details.

Refrigerated Air Dryer & Desiccant Air Dryer - Demargo

Demargo (Shanghai) Energy-Saving Technology Co., Ltd. is a national high-tech enterprise and a Shanghai "Specialized, Refined, Characteristic and Innovative" enterprise, devoting itself to the R&D, production, sales and after-sales service of compressed air purification equipment for 19 years. With a firm commitment to energy conservation, environmental protection and technological innovation, we have grown into a leading manufacturer in the air compression post-treatment industry, providing high-quality, customized solutions for global industrial customers.

Our core strength lies in strong technological research and development capabilities. Up to now, we have owned 24 authorized patents and 22 patents under application, covering key technologies of air drying and purification equipment, which effectively guarantees the stability and energy efficiency of our products. We have passed ISO9001 and QS certifications, and our products comply with international industrial standards, with dew point ranging from -23°C to -70°C, air treatment capacity of 1~500Nm³/min, and outlet oil content as low as 0.003PPM, reaching the industry-leading precision level.

We boast a comprehensive and diverse product portfolio, covering more than 60 product categories, including 21 standard products and a variety of non-standard customized products that lead the industry. Our main products include air compressors and their accessories, air receivers, refrigerated dryers (including plate heat exchanger type, high-temperature air-cooled type, DC inverter type, etc.), adsorption dryers, combined dryers, heat of compression adsorption dryers, filters, zero-air-consumption blower-heated dryers, self-cleaning air filters, compressed air pre-cooling units, low-temperature high-pressure nitrogen pre-cooling units, industrial chillers, oil-water separators, oil removers and aftercoolers, etc.. We support 12 types of product configurations such as air-cooled/water-cooled, fluorine-free/high-temperature, inverter/explosion-proof, and can provide intelligent solutions such as industrial computer and programmable control according to customer needs.

With excellent product quality and professional service, we have won wide recognition in the global market. Our customers

are distributed in more than 20 countries and regions around the world, including Brazil, Australia, etc., and we have established in-depth cooperation with more than 20 OEM manufacturers and 2299 brand agents. Our annual output reaches 9,682 sets, and the cumulative sales volume exceeds 100,000 sets, which fully demonstrates the market influence and customer trust in our brand.

Customer-centricity is our consistent service philosophy. We provide a full-cycle service system from pre-sales design, in-sales installation to after-sales maintenance: we promise 30-minute response, 24-hour online guidance and 48-hour on-site service, and ensure spare parts supply response within 24 hours, effectively solving the worries of customers in product use. We are committed to tailoring the most suitable compressed air purification solutions for customers in more than 30 industries such as power, aerospace, electronics, and chemical industry, helping enterprises reduce energy consumption, improve production efficiency and product quality.

Looking forward to the future, Demargo will continue to increase R&D investment, accelerate technological innovation, expand the global market layout, and strive to become a world-class provider of compressed air purification and energy-saving solutions. We sincerely look forward to cooperating with partners from all over the world to jointly promote the development of the global industrial energy-saving and environmental protection industry!
